

Frontend Developer (f/m/d)

Full-time/Part-time (30h+)

datavisyn

www.datavisyn.io

To address the increasing demand for our products, we are looking for developers with experience and interest in cutting-edge **web technologies** and **visual data science**. We are looking for candidates who can work full time (30h+). You will be part of a team with a flat hierarchy, a great atmosphere, and outstanding employee satisfaction.

Our software solutions support the world's leading pharmaceutical companies in the early phases of drug development, where the task is to search large and complex amounts of data for targets for the drugs of tomorrow. The aim is to make the discovery and development of new drugs and treatments faster, more reliable, and affordable.

Your **BENEFITS**

- Employment in a **growing company**
- Contributing to **cutting-edge visual analysis** products
- Flexible working hours
- Remote work for a part of your time
- Cooperation with **leading research labs** in the field of data visualization

Your **SKILLS**

- Education in a technical area (informatics, software engineering, computer science, telematics, etc.)
- Experience with **Web Frontend Technologies and Libraries** such as Typescript, React, and Bootstrap
- Independent and reliable **team player**
- Excellent knowledge of **English or German**

Your **FUTURE WORKPLACE and TECH STACK**

- You are part of an agile development team
- You develop high-quality production code
- You work with **state-of-the-art** web front-end technologies like HTML5, Sass, React, Typescript, D3.js, Vega-Lite, and plotly.js
- You apply tools like Git, GitHub, Slack, Docker, Kubernetes, Visual Studio Code, CircleCI, Webpack, npm, and many others
- You rely on database technologies such as PostgreSQL, MongoDB, and Elasticsearch
- You work in a brand new office building at the **JKU Campus**

The target compensation for this position is € 40,000 per year. In practice, the compensation package will be adjusted to your qualifications and experience. We are looking forward to hearing from you via career@datavisyn.io.
